## PROFESSIONAL SUMMARY

---

Entry-level cybersecurity professional with a strong interest in information security, penetration testing, and secure web development. Possesses foundational knowledge in web technologies, vulnerability assessment, and ethical hacking concepts, supported by an academic background in Artificial Intelligence and Data Science. Skilled in problem-solving, system analysis, and secure coding practices. Actively seeking an opportunity to apply technical skills and contribute to an innovative organization while learning and growing professionally.

## SKILLS

---

**Programming & Scripting:** Python, SQL, Bash, JavaScript (Basics), PowerShell (Basics)

**Security Fundamentals:** OWASP Top 10, Web Application Security, Network Security, Ethical Hacking, Threat Analysis, Vulnerability Assessment, Active Directory Fundamentals, Wireless & Cloud Security Basics

**Penetration Testing:** Web App Testing, Vulnerability Assessment, Reconnaissance, Enumeration, Exploitation Fundamentals, Privilege Escalation, Post-Exploitation, Password Attacks, Reporting & Documentation

**Tools:** Nmap, Burp Suite, Metasploit, Wireshark, Nessus, Nikto, Hydra, SQLMap, Gobuster, Netcat, Dirsearch

**Secure Development:** Secure Coding Practices, Basic Code Review, Web Security Principles

**Development & Web Technologies:** HTML, CSS, REST API Fundamentals, AI/Data Science Basics, ML Fundamentals

**Cloud & OS:** Linux, Kali Linux, Windows, AWS Fundamentals, Cloud Security Basics

**Soft Skills:** Critical Thinking, Problem Solving, Communication, Team Collaboration, Security Mindset, Continuous Learning

## EXPERIENCE

---

### Ethical Hacking & Cybersecurity Intern | Novi Tech R&D Pvt Ltd | Jun 2025 – Aug 2025

- Conducted penetration testing and OWASP Top 10 assessments, identifying 25+ vulnerabilities across 10+ environments.
- Executed 20+ attack simulations using Nmap, Burp Suite, and Metasploit, covering reconnaissance through post-exploitation.
- Documented security findings and remediation recommendations, supporting threat analysis and incident response.

## PROJECTS | GITHUB – <https://github.com/DH4N453K4R4N>

---

### Predictive Modeling for Network Threat Detection using AI

- Developed an AI-based network threat detection system using Random Forest, AdaBoost, and Naive Bayes, achieving 94.2% overall accuracy and 93.8% F1-score on a dataset of 50,000+ network traffic records.
- Implemented end-to-end data preprocessing and feature engineering, reducing noise and redundancy by 40%+ feature elimination, which improved model performance and reduced false positives significantly.
- Built a full-stack deployment using Python & Django, integrating the trained ML model (.pkl) with a web interface to deliver real-time threat predictions, enabling classification of 12+ attack types with low latency.

### VulnHub DC-8 Penetration Testing Project

- Conducted end-to-end penetration testing following industry methodology, identifying SQL Injection, Remote Code Execution, and Privilege Escalation, achieving 100% system compromise (root access).
- Exploited a vulnerable web parameter to extract 1 database (d7db), multiple tables, and user credentials, successfully cracking hashed passwords and gaining authenticated access.
- Achieved web user → root escalation using PHP misconfiguration + local exploit, a 6-stage end-to-end attack.

## EDUCATION

---

**B.Tech – Artificial Intelligence & Data Science – 7.97 (CGPA)**

Anand Institute of Higher Technology (2021–2025)

## CERTIFICATIONS

---

- Certified Penetration Tester – RTHA, Chennai
- Ethical Hacker, Introduction to Cybersecurity – CISCO
- Full Stack Development – NoviTech R&D Pvt Ltd
